BlueLinxCo.com

Professional contractor grade for moderate to severe weather.

Severe weather demands a serious defense.

Breathable and easy-to-install, ProLinx® Plus HP is a non-perforated, non-woven, permeable membrane with unique smart-perm technology that reduces inward vapor solar drive for uncompromising protection from the effects of harsh weather.

a a [] c

Surfactant resistant Not affected by pressure washing, jobsite chemicals, or sugars from tree sap and wood sidings, unlike some other products.

Superior strength Its non-perforated, non-woven polyolefin composition gives ProLinx® Plus HP superior strength.

Longer UV Resistance Special ultraviolet stabilizers protect it from the sun's harsh rays. In fact, it's the sun's UV radiation that causes most other products to fail. ProLinx® Plus HP is made with UV stabilizers that provide up to 20 years of protection against UV damage.
